

MONITORING TRAP

PRODUCT NAME: Dome (McPhail) Trap - Bulk
PRODUCT CODE: BC 1752

PRODUCT DESCRIPTION

The Dome trap is designed as a new shape to the classic McPhail trap design for fruit flies. The insects attracted by the incorporated pheromone or attractant lure fly up the funnel shaped catchment area into the holding area. The shape of the funnel prevents the insects from escaping holding them until the trap is inspected. An insecticide toxicant strip is often included in the trap to kill the trapped insects further reducing the possibility of escape and preventing damage to the specimens for subsequent identification. The components are made of UV stabilised polystyrene and should give an expected active life of 1 year minimum (2 years can be expected under normal field use).

Approximate Dimensions (Assembled)	170mm diameter x 185mm high
Dome Dimensions	170mm diameter x 150mm high
Dome Material	Polystyrene
Dome Colour	Clear
Base Dimensions	165mm diameter x 80mm high
Base Colour	Yellow
Approximate Weight (per Trap)	250 g
Kit Contents	1 Clear lid, 1 Yellow base, Treasury tag
Outer Carton Contents	100 Kits

RECOMMENDATIONS FOR USE

DIRECTIONS FOR USE:

Insert the attractant lure for the target insect into the holder at the top of the trap and, if used, the toxicant strip in the base. Fit the attachment cord through the two holes on the trap top. The top and base sections of the trap are lock fitted together. Place in the field as required for the target insect (see separate).

PRECAUTIONS:

Care should be taken when handling the attractant lures and the toxicant strips. Read the instructions for handling these before use. Avoid contact with skin. Wash hands if contact unavoidable. If swallowed do not induce vomiting and seek medical advice.

STORAGE AND HANDLING:

Store away from direct sunlight.
