

# Technical Data Sheet

**PRODUCT NAME:** Window Fly Sticker  
**PRODUCT CODE:** BC 2317

## PRODUCT DESCRIPTION

The Window Fly Sticker is a trap with an attractive flower design that can be placed discretely in windows to catch nuisance flies

Approximate Dimensions	95mm x 95mm
Material	Printed self adhesive glue coated sheet
Colour	Transparent with printed flower design
Packaging	Carton
Pack size	1500 traps / carton

## RECOMMENDATIONS FOR USE

### TRAP:

Many flies are naturally attracted to light and fly towards windows. On buzzing around the window they encounter the sticker, attracted by the colour. Additionally, housefly pheromone is formulated into the glue providing additional short range attraction.

### PREPARATION OF TRAP:

Peel off the paper from the front of the trap, printed with instructions to 'peel this side first', and apply to the window. Remove the remaining piece of cover paper from the other side of the trap exposing the glue coat. The trap is now ready for use.

### TRAP PLACEMENT

The Window Fly Sticker should ideally be placed at the lower edges of windows in an inconspicuous location, such as behind curtains

### TRAP SERVICING:

Traps should be changed after 3 months or if the trap becomes coated with dust or insects

**For Safety, Environmental and Disposal details see the corresponding Material Safety Data Sheet**
